

## SQLBolt Updating rows Exercise 14 — Tasks

Source: [https://sqlbolt.com/lesson/updating\\_rows](https://sqlbolt.com/lesson/updating_rows)

Q) The director for A Bug's Life is incorrect, it was actually directed by John Lasseter

Ans:

```
UPDATE movies
SET director="John Lasseter"
WHERE title="A Bug's Life";
```

### Explanation:

- `UPDATE movies`: Indicates that we are modifying rows in the `movies` table.
- `SET director = "John Lasseter"`: Changes the `director` column to the correct name.
- `WHERE title = "A Bug's Life"`: Targets only the movie titled *A Bug's Life*.

Q) The year that Toy Story 2 was released is incorrect, it was actually released in 1999

Ans:

```
UPDATE movies
SET year=1999
WHERE title="Toy Story 2";
```

### Explanation:

- `SET year = 1999`: Updates the `year` column to the correct release year.
- `WHERE title = "Toy Story 2"`: Ensures only *Toy Story 2* is affected.

Q) Both the title and director for Toy Story 8 is incorrect! The title should be "Toy Story 3" and it was directed by Lee Unkrich

Ans:

```
UPDATE movies  
SET director="Lee Unkrich", title="Toy Story 3"  
WHERE title="Toy Story 8";
```

### Explanation:

- `SET director = "Lee Unkrich", title = "Toy Story 3"`: Updates **two fields** at once — the director and the title.
- `WHERE title = "Toy Story 8"`: Ensures the update applies only to the incorrect placeholder movie *Toy Story 8*.
