SQLBolt Deleting rows Exercise 15 — Tasks

Source:

Q) This database is getting too big, lets remove all movies that were released before 2005.

Ans:
DELETE
FROM movies
WHERE year<2005;

Explanation:

- `DELETE FROM movies`: This command deletes rows from the `movies` table.

- `WHERE year < 2005`: The condition ensures only movies **released before 2005** are removed.

Q) Andrew Stanton has also left the studio, so please remove all movies directed by him.

Ans:
DELETE
FROM movies
WHERE director="Andrew Stanton"

Explanation:

- `DELETE FROM movies`: Deletes records from the `movies` table.

- `WHERE director = "Andrew Stanton"`: Ensures only those movies **directed by Andrew Stanton** are removed.
